HASHI

Join circled numbers with horizontal or vertical lines:

- Each number must have as many lines connected to it as specified by its value.
- No more than two lines may join any pairs of numbers.
- No lines may cross
- The finished layout must allow you to travel from any number to any other number, just by following one or more lines.

CODEWORD

A codeword is a coded crossword in which every letter has been replaced by a number indicated by the small digits in the top left corner of each square. Work out which number represents each letter of the alphabet and use this information to complete the crossword.

BRAIN CHAINS

Without using a calculator or making any written notes, solve each brain chain as quickly as you can:

- Start with the bold value at the top of the chain.
- Follow the arrow and apply the first operation, remembering the result.
- Follow the next arrow and apply the second operation to the remembered value.
- Keep following arrows and applying operations until you reach the result box.
- Write in the calculated value.

CALCUDOKU

Place the digits from 1 to 6 once each into every row and column while obeying the given region values:

- The region value at the top left of each bold lined shape must be obtained when all the digits in that region have the given operation [+ , - , x , ÷] applied between for them.
- For – and ÷ operations start with the largest number in the region and then subtract or divide by the other numbers. For example, the contents of the two square 4- region could be 2 and 6, since $6-2 = 4$.
